If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

DETAILED ACTION

Status of Claims

Claims 1-28 have been presented for examination in this application.

Claims 1-28 are allowed.

Allowable Subject Matter

The art of record neither teaches nor fairly suggests a method of independent claim 1 including the following combination of limitations defining the main invention/embodiment:

“ .. in response to a request to store an object of a size less than a storage transfer unit: searching for a cached storage transfer unit with sufficient free space to store the object; if no such cached storage transfer unit can be found, identifying an uncached storage transfer unit with sufficient free space to store the object and storing a copy of the identified storage transfer unit in the cache; and

.. storing the object in the identified storage transfer unit by modifying at least one data structure in the cache and subsequently writing a cached copy of the storage transfer unit to the first storage medium ”.

Art Unit: 2185

The art of record neither teaches nor fairly suggests a method of independent claim 16 including the following combination of limitations defining the main invention/embodiment:

identifying an object position in the storage transfer unit by an object offset in the storage transfer unit;

.. In response to a request to one of access and update a storage transfer unit, copying the storage transfer unit so that different objects are copied into different buffers;

.. performing at least one update to at least one object in the storage transfer unit by modifying at least one buffer; and

after the at least one update has occurred, updating the storage transfer unit from the at least one buffer “.

The art of record neither teaches nor fairly suggests an apparatus of independent claim 25 including the following combination of limitations defining the main invention/embodiment:

“ (iii) in response to a request to store an object of a size less than a storage transfer unit: searching for a cached storage transfer unit with sufficient free space to store the object; if no such cached storage transfer unit can be found, identifying an uncached storage transfer unit with sufficient free space to store the object and storing a copy of the identified storage transfer unit in the cache; and storing the object in the identified storage transfer unit by modifying at least one data structure in the cache and

subsequently writing a cached copy of the storage transfer unit to the first storage medium “.

The art of record neither teaches nor fairly suggests an apparatus of independent claim 26 including the following combination of limitations defining the main invention/embodiment:

“ .. (i) identify an object position in the storage transfer unit by an object offset in the storage transfer unit; (ii) in response to a request to one of access and update a storage transfer unit, copy the storage transfer unit so that different objects are copied into different buffers; (iii) perform at least one update to at least one object in the storage transfer unit by modifying at least one buffer; and (iv) after the at least one update has occurred, update the storage transfer unit from the at least one buffer”.

The art of record neither teaches nor fairly suggests an apparatus of independent claim 27 including the following combination of limitations defining the main invention/embodiment:

“ .. in response to a request to store an object of a size less than a storage transfer unit: searching for a cached storage transfer unit with sufficient free space to store the object;

if no such cached storage transfer unit can be found, identifying an uncached storage transfer unit with sufficient free space to store the object and storing a copy of the identified storage transfer unit in the cache;

.. storing the object in the identified storage transfer unit by modifying at least one

Art Unit: 2185

data structure in the cache and subsequently writing a cached copy of the storage transfer unit to the first storage medium “.

The art of record neither teaches nor fairly suggests an article of manufacturing of independent claim 28 including the following combination of limitations defining the main invention/embodiment:

“ .. identifying an object position in the storage transfer unit by an object offset in the storage transfer unit;

.. in response to a request to one of access and update a storage transfer unit, copying the storage transfer unit so that different objects are copied into different buffers;

.. performing at least one update to at least one object in the storage transfer unit by modifying at least one buffer; and

.. after the at least one update has occurred, updating the storage transfer unit from the at least one buffer “.

The remaining dependent claims, not specifically mentioned, are allowed for the same rationale as the independent claim(s) being based from.
